About Us

History

Custom Countertops, Inc. was originally founded in 1977 by Dan Olson. Since 1986, we've been fabricating solid surface countertops.

After several years in business, we have grown to become one of the largest fabricators and installers in the Willamette Valley.

Our satisfied list of customers includes homeowners, builders, interior designers, architects and kitchen and bath dealers.

Facility

Our fabrication facility and showroom is centrally located in Salem, Oregon. We utilize the most advanced solid surface CNC machinery available. Staffed with skilled fabrication and installation crews, we can deliver a custom countertop that will complete your remodeling or new construction project.

Designer Corner - Solid Surfaces

Corian - Corian® is easy to clean and is [certified kosher](#). Because Corian® is nonporous, stains do not penetrate the surface. With proper cleaning, Corian® also resists the growth of mold, mildew and bacteria. Corian® is also heat and scratch resistant.

corian.
SOLID SURFACES

LG Hi-Macs - LG HI-MACS Acrylic Solid Surface is a solid homogeneous sheet or slab resistant to stains. This means the color and design are consistent throughout making it ideal for surfaces that are subject to moisture and heavy wear. This non-porous surface rejects the growth of bacteria making it the logical choice in areas of food preparation, even over granite. It has the elegance of stone with a thermoformable quality, giving you creative license to explore your ideas with confidence.

[Click for LG Hi-Macs Sink Selections](#)

Staron - Staron® Solid Surfaces are also highly functional. They're durable, stain-resistant, easy-to-clean, and repairable. A healthy countertop choice, Staron® is nonporous, so bacteria, molds and moisture cannot penetrate its surface. Imperceptible seams, plus the option to incorporate Staron® sinks or bowls, enables designers to customize a one-of-a-kind integrated solid-surface countertop system. These features also make solid surface one of the few materials approved for use in commercial food service areas and in health care facilities where hygiene and resistance to pathogens is important.

Wilsonart - Gibraltar - Gibraltar® half-inch acrylic Solid Surface is ideal for a wide array of environments including residential spaces, office buildings, retail centers, and healthcare facilities. It's also FDA and NSF approved for food preparation areas and has inconspicuous waterproof seams. Now you can experience the luxury and prestige of a surface that boasts incredible strength, is renewable and repairable, allows freedom in design, and is resistant to stains, mold and mildew.

Designer Corner - Natural Quartz

Cambria - Cambria natural quartz surfaces are twice as strong as granite, it's a surface that is truly everlasting. Maintenance Free - No sealing, polishing or reconditioning is needed. Simply wash with warm water. It's that simple. Plus, unlike granite, Cambria will resist stains from fruit juices, food coloring, coffee, tea, wine, grape juice and nail polish. Unlike granite, Cambria has been certified by NSF International for use as a food preparation surface. Cambria is non-porous, making cleanup easy and preventing food and moisture from penetrating its surface — the main source of growth for harmful bacteria.

LG Viatera - LG Viatera®, categorized as quartz surfacing, is the newest addition to the LG family of countertop surfacing products. LG Viatera® is composed of quartz blended with advanced polymer resins and colorfast pigments. The innovative design combined with cutting edge technology makes LG Viatera® the highest quality quartz surfacing material available. LG Viatera® is 93% natural quartz providing an extremely durable living environment for the most demanding of consumers. Unlike Granite or Marble, LG Viatera® does not need topical sealing, allowing lasting beauty with very little maintenance. LG Viatera® appeals to those who prefer the elegant look of stone, but desire a product that is easy to maintain.

CaesarStone - Comprised of 93% natural quartz, CaesarStone Quartz Surfaces and Countertops offer the ultimate combination of form and function, allowing for a more diverse, durable, and practical countertop surfacing material than either granite or marble. With its stain, scratch, and heat-resistant properties, CaesarStone is the ideal choice for care-free countertops.

Getting Started - Frequently asked questions

Q. Why should I buy Solid Surface instead of Granite?

A. Unlike Granite, Solid Surface is consistent in color and pattern all the way through and it can be cut, inlayed, routed and formed in an unlimited number of ways with inconspicuous seams. Solid Surface is nonporous, stain resistant and easily repairable.

Q. Why should I buy Solid Surface instead of Tile?

A. Unlike tile, Solid Surface is chip and crack resistant, if scratches occur they are easily buffed away, the nonporous surface is easy to clean. You don't have to worry about cleaning those grout joints all the time!

Q. How much does Solid Surface cost?

A. Price is competitive to other countertop products in the market depending on product, pattern, and edge detail. The best to get a price is to contact Custom Countertops and let us come out and measure your top to provide you with a quote.

Q. Where can I use Solid Surface?

A. Residential: Used in kitchen, vanities, tub decks, shower walls, wainscoting, wall caps, etc... Commercial: Used in hospitals, restaurants, boats, airline lavatories, offices, multi-unit housing, etc...

Q. How do I care for my Solid Surface and sink?

A. Most dirt and stains can be removed with soapy water. To remove more difficult stains from a semi-gloss finish, use Soft-Scrub and a white ultrafine Scotch-Brite pad.
